

VAN or TRUCK LIQUID OXYGEN STORAGE CONTAINERS

EASE OF OPERATION

- Our vertical Stainless Steel Van Tanks are built with the operator in mind. Conveniently located valves make it simple and easy for your driver to operate. Features easy to read pressure and level gauges.

SAFE

- Stainless steel inner and outer containers, Stainless steel piping, easy turn valves, separate pipe away relief valve and burst disc.
- Pressure relief port on tank outer shell.
- Meets DOT-4L Specification.

CONVENIENT

- Wide range of sizes available.
- The vertical design requires less room in the vehicle making it the perfect tank for smaller vehicle.

EFFICIENT

- Medium or low pressure (35, 50 and 100 psi) models for economical transfer.
- Super insulated for low loss rates.
